

auction, the final withdrawal payment cannot be calculated until a corresponding license receives a higher bid or winning bid in a subsequent auction. When that final payment cannot yet be calculated, the bidder responsible for the withdrawn bid is assessed an interim bid withdrawal payment, which will be applied toward any final bid withdrawal payment that is ultimately assessed.<sup>377</sup>

298. The Commission recently amended its rules to provide that in advance of the auction, the Commission shall establish a percentage between three percent and twenty percent of the withdrawn bid to be assessed as an interim bid withdrawal payment.<sup>378</sup> When it adopted the new rule, the Commission indicated that it would consider the nature of the service and the inventory of the licenses being offered when determining the level of the interim withdrawal payment in a particular auction.<sup>379</sup>

299. In the *700 MHz Auction Public Notice*, the Bureau noted that the 700 MHz auction will offer licenses under several different geographic licensing schemes and bandwidth sizes, and it found that bidders may have a legitimate interest in using withdrawals to facilitate their efforts to aggregate licenses across potentially substitutable blocks of licenses not subject to package bidding. The Bureau also observed that the likely significant bid amounts for licenses in this auction (and resulting absolute value of withdrawal payments) will in themselves serve as a deterrent to unnecessary withdrawals. Therefore, the Bureau did not propose to set the interim bid withdrawal payment at the maximum rate of twenty percent. At the same time, the Bureau noted that a rate above the minimum three percent will help deter undesirable strategic use of withdrawals. Specifically, the Bureau proposed to establish an interim bid withdrawal payment of ten percent of the withdrawn bid in the 700 MHz auction and sought comment on this issue.<sup>380</sup>

300. No commenters suggested any alternative to the Bureau's proposed percentage for interim withdrawal payments. For the reasons set forth above and in the *700 MHz Auction Public Notice*, we adopt the Bureau's proposal. The Commission will assess an interim withdrawal payment equal to ten percent (10%) of the amount of the withdrawn bids. The ten percent (10%) interim payment will be applied toward any final bid withdrawal payment that will be assessed after subsequent auction of the license. Assessing an interim bid withdrawal payment ensures that the Commission receives a minimal withdrawal payment pending assessment of any final withdrawal payment. Section 1.2104(g) provides specific examples showing application of the bid withdrawal payment rule.<sup>381</sup>

### 3. Additional Default Payment Percentage

301. Any winning bidder that defaults or is disqualified after the close of an auction (i.e., fails to remit the required down payment within the prescribed period of time, fails to submit a timely long-form application, fails to make full payment, or is otherwise disqualified) is liable for a default payment under Section 1.2104(g)(2) of the Commission's rules.<sup>382</sup> This payment consists of a deficiency payment, equal to the difference between the amount of the bidder's bid and the amount of the winning bid the next time a license covering the same spectrum is won in an auction, plus an additional payment equal to a percentage of the defaulter's bid or of the subsequent winning bid, whichever is less. Until recently this additional payment for non-combinatorial auctions has been set at three percent of the defaulter's bid or of the subsequent winning bid, whichever is less.

<sup>377</sup> *Id.*

<sup>378</sup> See CSEA/Part 1 Report and Order, 21 FCC Rcd at 903 ¶ 30.

<sup>379</sup> *Id.* at 903-04 ¶ 31.

<sup>380</sup> *700 MHz Auction Public Notice* at ¶¶ 87-89.

<sup>381</sup> 47 C.F.R. § 1.2104(g).

<sup>382</sup> 47 C.F.R. § 1.2104(g)(2).

302. The percentage of the bid that a defaulting bidder must pay in addition to the deficiency will depend on the auction format ultimately chosen for a particular auction. In non-package auctions, the amount can range from three percent up to a maximum of twenty percent, established in advance of the auction and based on the nature of the service and the inventory of the licenses being offered.<sup>383</sup> In auctions with package bidding, the additional payment is set, pursuant to Section 1.2104(g)(2)(ii), at 25 percent of the applicable bid. This higher level reflects the fact that a defaulted winning bid in an auction with package bidding may have affected which other bids were winning other licenses.<sup>384</sup>

303. The Bureau proposed to establish an additional default payment of fifteen percent with respect to bids on licenses in Blocks A, B, D, and E, which are not subject to package bidding. As previously noted by the Commission, defaults weaken the integrity of the auction process and impede the deployment of service to the public, and an additional default payment of more than three percent will be more effective in deterring defaults. Moreover, the Bureau concluded an additional default payment greater than ten percent, which the Commission has established in several recent auctions, is appropriate for the 700 MHz auction.<sup>385</sup> Because no licenses in Blocks A, B, or E will be sold unless the aggregate reserve price for that block is met, bidders may have an additional incentive to bid on a license and later default (after determination that the reserve price has been met), in order to help ensure that the reserve price is met and other initial licenses in the block are assigned. The Bureau concluded that a higher additional default payment will help deter such behavior. With respect to the D Block, for which there is a single nationwide license that will not be assigned unless the D Block reserve price is met, a default by the winning bidder will delay the especially time-sensitive process of establishing a public-private partnership for the provision of public safety services. Given the unusually large public interest benefits of timely licensing the D Block, the Bureau proposed to deter defaults by imposing a higher additional default payment in that block as well. Accordingly, it proposed an additional default payment of fifteen percent on licenses in the A, B, D, and E Blocks. The Bureau sought comment on this proposal.<sup>386</sup> The Bureau stated that for licenses in the C Block, because they are subject to package bidding, the additional default payment will be twenty-five percent as set forth in Section 1.2104(g)(2)(ii). This additional default payment will apply to all bids for packages and for licenses that are subject to package bidding.<sup>387</sup>

304. While no comments filed in response to the *700 MHz Auction Public Notice* focused on the appropriate percentage for the additional default payments, Frontline proposed in its comments that the Commission impose no default penalty in connection with any defaults on a winning bid for the D Block license.<sup>388</sup> Frontline's argument focused particularly on a scenario where the winning bidder is unable to negotiate a Network Sharing Agreement with the Public Safety Licensee, even while negotiating in good faith.<sup>389</sup> MetroPCS opposed Frontline's proposal in its reply.<sup>390</sup> As it appeared to acknowledge in its comments, Frontline's proposal runs counter to the Commission's decision in the *700 MHz Second Report and Order*, which held that "[i]n the event that the long-form application filed by the

<sup>383</sup> See *CSEA/Part 1 Report and Order*, 21 FCC Rcd at 903 ¶ 30.

<sup>384</sup> 47 C.F.R. § 1.2104(g)(2)(ii).

<sup>385</sup> See *Auction 66 Procedures Public Notice*, 21 FCC Rcd at 4627-28 ¶ 258; see also *Auction 69 Procedures Public Notice*, 21 FCC Rcd at 12440 ¶ 193; *Auction 71 Procedures Public Notice*, 22 FCC Rcd at 477 ¶ 183; *Auction 72 Procedures Public Notice*, 22 FCC Rcd at 3447 ¶ 186.

<sup>386</sup> *700 MHz Auction Public Notice* at ¶¶ 90-92.

<sup>387</sup> *Id.* at ¶ 93.

<sup>388</sup> Frontline Comments at 16-17.

<sup>389</sup> *Id.* at 17.

<sup>390</sup> MetroPCS Reply comments at 13.

winning bidder for the D Block license is denied, the winning bidder of the D Block licenses will be deemed to have defaulted . . . [and] it will be liable for the default payment set forth" in the Commission's competitive bidding rules.<sup>391</sup> Accordingly, Frontline's proposal is beyond the scope of the current non-rulemaking auction procedures process.

305. For the reasons set forth above and discussed in the *700 MHz Auction Public Notice*, we adopt the Bureau's proposal and set the additional default payment percentage at fifteen percent of the defaulted bid for licenses in the A, B, D and E Blocks. Pursuant to existing Commission rules regarding licenses subject to package bidding, the additional default payment percentage will be twenty-five percent of the defaulted bid for licenses in the C Block.<sup>392</sup> These percentages are appropriate to reduce the risk that bidders may default on their winning bids.

#### B. Down Payments

306. After bidding has ended in Auction 73 and Auction 76, the Commission will issue a public notice declaring the auction(s) closed and identifying winning bidders, down payments and final payments due. In addition, if the D Block bidding satisfies the reserve price and there is a winning bidder for the D Block license in Auction 73, the Commission will issue a public notice identifying the winning bidder, down payments and final payments due after bidding ends in Auction 73, even if Auction 76 will be held for licenses in any other block(s).

307. Within ten business days after release of the auction closing notice, each winning bidder must submit sufficient funds (in addition to its upfront payment) to bring its total amount of money on deposit with the Commission for licenses offered in Auction 73 and Auction 76 to 20 percent of the net amount of its winning bids (gross bids less any applicable small business or very small business bidding credits).<sup>393</sup>

#### C. Final Payments

308. Each winning bidder will be required to submit the balance of the net amount of its winning bids within 10 business days after the applicable deadline for submitting down payments.<sup>394</sup>

#### D. Long-Form Application (FCC Form 601)

309. Within ten business days after release of the auction closing notice, winning bidders must electronically submit a properly completed long-form application (FCC Form 601) for each license won through Auction 73 and/or Auction 76. Winning bidders that are small businesses or very small businesses must demonstrate their eligibility for a small business or very small business bidding credit.<sup>395</sup> Further filing instructions will be provided to auction winners at the close of the auction.

310. The *CSEA/Part 1 Report and Order* modified the procedure by which a consortium that is a winning bidder in Auction 73 and/or Auction 76 will apply for a license.<sup>396</sup> In particular, (a) each member or group of members of a winning consortium seeking separate licenses will be required to file a separate long-form application for its respective license(s) and, in the case of a license to be partitioned or

<sup>391</sup> *700 MHz Second Report and Order* at ¶ 508; see Frontline Comments at 17.

<sup>392</sup> If C block licenses are included in a subsequent Auction 76, the additional default percentages applying to C1 block licenses will be those for non-package bidding auctions, while package bidding percentages will apply to licenses in the C2 Block.

<sup>393</sup> 47 C.F.R. § 1.2107(b).

<sup>394</sup> 47 C.F.R. § 1.2109(a).

<sup>395</sup> 47 C.F.R. § 1.2112(b).

<sup>396</sup> *CSEA/Part 1 Report and Order* at ¶¶ 51-52, petitions for reconsideration pending.

disaggregated, the member or group filing the applicable long-form application shall provide the parties' partitioning or disaggregation agreement in its long-form application; (b) two or more consortium members seeking to be licensed together shall first form a legal business entity; and (c) any such entity must meet the applicable eligibility requirements for small business status.<sup>397</sup> Applicants applying as consortia should review the *CSEA/Part 1 Report and Order* in detail and monitor any relevant future proceedings to understand how the members of the consortia will apply for a license in the event they are winning bidders.

#### E. Ownership Disclosure Information Report (FCC Form 602)

311. At the time it submits its long-form application (FCC Form 601), each winning bidder also must comply with the ownership reporting requirements as set forth in 47 C.F.R. §§ 1.913, 1.919, and 1.2112. An ownership disclosure record is automatically created in ULS for any applicant that submits an FCC Form 175. However, winning bidders will be required to review and confirm that it is complete and accurate as of the date of filing Form 601. Further instructions will be provided to winning bidders at the close of the auction.

#### F. Tribal Lands Bidding Credit

312. A winning bidder that intends to use its license(s) to deploy facilities and provide services to federally recognized tribal lands that are unserved by any telecommunications carrier or that have a wireline penetration rate equal to or below 85 percent is eligible to receive a tribal lands bidding credit as set forth in 47 C.F.R. §§ 1.2107 and 1.2110(f). A tribal lands bidding credit is in addition to, and separate from, any other bidding credit for which a winning bidder may qualify.

313. Unlike other bidding credits that are requested prior to the auction, a winning bidder applies for the tribal lands bidding credit after winning the auction when it files its long-form application (FCC Form 601). When initially filing the long-form application, the winning bidder will be required to advise the Commission whether it intends to seek a tribal lands bidding credit, for each license won in the auction, by checking the designated box(es). After stating its intent to seek a tribal lands bidding credit, the applicant will have 180 days from the close of the long-form filing window to amend its application to select the specific tribal lands to be served and provide the required tribal government certifications. Licensees receiving a tribal lands bidding credit are subject to performance criteria as set forth in 47 C.F.R. § 1.2110(f)(3)(vi).<sup>398</sup>

314. For additional information on the tribal lands bidding credit, including how the amount of the credit is calculated, applicants should review the Commission's rule making proceeding regarding tribal lands bidding credits and related public notices.<sup>399</sup> Relevant documents can be viewed on the

#### G. Default and Disqualification

315. Any winning bidder that defaults or is disqualified after the close of the auction (i.e., fails to remit the required down payment within the prescribed period of time, fails to submit a timely long-form application, fails to make full payment, or is otherwise disqualified) will be subject to the payments described in 47 C.F.R. § 1.2104(g)(2). The payments include both a deficiency payment, equal to the difference between the amount of the bidder's bid and the amount of the winning bid the next time a license covering the same spectrum is won in an auction, plus an additional payment equal to a percentage of the defaulter's bid or of the subsequent winning bid, whichever is less.

316. Pursuant to recent modifications to the rule governing default payments, the percentage of the applicable bid to be assessed as an additional payment for defaults in a particular auction is established in advance of the auction. Accordingly, in the *700 MHz Auction Public Notice*, the Bureau proposed to set the additional default payment for the auction of 700 MHz Band licenses at fifteen percent of the applicable bid with respect to bids on licenses in Blocks A, B, D, and E, which are not subject to package bidding. For licenses in the C Block, because they are subject to package bidding, the additional default payment will be twenty-five percent as set forth in Section 1.2104(g)(2)(ii).

317. As discussed above, the Commission will apportion package bids when regulatory calculations require individual license bid amounts by dividing the package bid amount among the licenses comprising the package in proportion to the final round CPEs for the licenses. Accordingly, in the event that a winning bidder defaults on a package bid for C Block licenses and the licenses subsequently are won individually or in a different combination, the Bureau will apportion the defaulted package bid for the C Block licenses based on the ratio of the bidding units for the relevant licenses to the bidding units for the entire package.

318. As discussed above, we adopted the Bureau's proposal and set the additional default payment for the auction of 700 MHz Band licenses at fifteen percent of the applicable bid for licenses in Blocks A, B, D, and E and at twenty-five percent of the applicable bid for Block C packages and licenses.

319. Finally, the Bureau notes that in the event of a default, the Commission may re-auction the license or offer it to the next highest bidder (in descending order) at its final bid amount.<sup>400</sup> In addition, if a default or disqualification involves gross misconduct, misrepresentation, or bad faith by an applicant, the Commission may declare the applicant and its principals ineligible to bid in future auctions, and may take any other action that it deems necessary, including institution of proceedings to revoke any existing licenses held by the applicant.<sup>401</sup>

#### H. Refund of Remaining Upfront Payment Balance

320. The Commission received two sets of comments addressing the refund of upfront payments.<sup>402</sup> The 4G Coalition urges that the Commission clarify that it will promptly refund upfront payments after the close of the initial auction, prior to Auction 76.<sup>403</sup> It maintains that this would promote

<sup>400</sup> 47 C.F.R. § 1.2109(b) and (c).

<sup>401</sup> 47 C.F.R. § 1.2109(d).

<sup>402</sup> 4G Coalition Comments at 8-9; MetroPCS Comments at 26. Verizon Wireless also states, without explanation, that bidders should be able to receive refunds of upfront payments after the Commission announces that alternative licenses will be offered. See Verizon Wireless Comments at 4, n.7.

<sup>403</sup> 4G Coalition Comments at 8.

full participation in the auction.<sup>404</sup> MetroPCS advocates the adoption of procedures for the refund of upfront payments, and other deposits, after they are deposited in the Digital Television Transition and Public Safety Fund on June 30, 2008, pursuant to the DTV Act.<sup>405</sup> MetroPCS argues that the lack of such procedures would discourage the participation of potential applicants.<sup>406</sup>

321. The Commission concluded that Auction 73 and Auction 76 are a single auction event for purposes of the Commission's anti-collusion rule.<sup>407</sup> Applicants in Auction 73 are prohibited from communicating bids or bidding strategies prior to the conclusion of Auction 76. Disclosing the activity of applicants in Auction 73 or Auction 76 by providing for refunds of upfront payments prior to the conclusion of Auction 76 would conflict with this conclusion. As a practical matter, we note that applicants in any Commission auction must take into account the fact that the Commission's auctions are of indefinite duration. Thus, even if Auction 76 should not prove necessary, applicants cannot reasonably expect the return of funds by any specific date and therefore cannot reasonably require that funds be refunded immediately after the Commission announces that it will make alternative licenses available for Auction 76. Moreover, bidders in Auction 73 subject to any liabilities arising from Auction 73 may not have the extent of their liability determined prior to the close of Auction 76. For example a bidder that withdrew a provisionally winning bid in Auction 73 would be subject to a determination of the extent of its liability only after the conclusion of Auction 76. The Commission has never provided for refunds of upfront payments to such bidders. In the past, the Commission has provided for refunds of upfront payment to bidders that have no auction liabilities and no remaining bidding eligibility prior to the competition of an auction. Nevertheless, the Commission has not made any such refunds in auctions subject to anonymous bidding. For all of these reasons, we conclude that bidders reasonably should be required to maintain their upfront payments in Auction 73 and Auction 76 on deposit with the Commission until the conclusion of any contingent subsequent auction.

322. All upfront payments submitted by applicants in Auction 73 and all upfront payments submitted by Auction 73 qualified bidders in connection with Auction 76 may be available to be refunded after the conclusion of any contingent subsequent auction; subject to any required payments (i.e. winning bid, deficiency, withdrawal, and/or default payments). All refunds will be returned to the payer of record, as identified on the FCC Form 159, unless the payer submits written authorization instructing otherwise.

323. Bidders are encouraged to file their refund information electronically using the **Refund Information** icon found on the *Auction Application Manager* page or through the **Wire Transfer for Refund Purposes** link available in various locations throughout the FCC Auction System. If an applicant has completed the refund instructions electronically, the refund will be sent automatically. If an applicant has not completed the refund instructions electronically, the applicant may send a written request for the refund, including wire transfer instructions and FCC Registration Number (FRN) by facsimile to the Auctions Accounting Group at (202) 418-2843 or by mail to:
